

Appendix 2 (as supplied by the authors): Antibiotics included in each antibiotic class

Antibiotic class	Antibiotics
Aminoglycosides	Amikacin Gentamicin Paromomycin Streptomycin Tobramycin
Antitubercular agents <i>(removed from analyses)</i>	Ethambutol Ethionamide Isoniazid Pyrazinamide Rifabutin Rifampin
Carbapenems	Ertapenem Meropenem
Cephalosporins	Cefaclor Cefadroxil Cefazolin Cefixime Cefotaxime Cefoxitin Cefprozil Ceftazidime Ceftriaxone Cefuroxime Cephalexin
Fluoroquinolones	Ciprofloxacin Gatifloxacin Levofloxacin Moxifloxacin Ofloxacin
Glycopeptides	Vancomycin
Lincosamides	Clindamycin
Macrolides	Azithromycin Clarithromycin Erythromycin Fidaxomicin Telithromycin
Metronidazole	Metronidazole

Penicillins	Amoxicillin Amoxicillin and clavulanic acid Ampicillin Cloxacillin Penicillin V Penicillin V benzathine Piperacillin and tazobactam Pivampicillin
Tetracyclines	Demeclocycline Doxycycline Minocycline Tetracycline Tigecycline
Trimethoprim and/or sulphonamides	Trimethoprim Trimethoprim and sulfamethoxazole Sulfisoxazole and erythromycin
Other urinary anti-infectives	Fosfomycin Nitrofurantoin
Other antibiotics	Colistin Dapsone Daptomycin Fusidic acid Linezolid
