STROBE Statement—Checklist of items that should be included in reports of ***cohort studies***

	Item No	Recommendation	Line #
Title and abstract	1	(*a*) Indicate the study's design with a commonly used term in the title or the abstract	2
		(*b*) Provide in the abstract an informative and balanced summary of what was done and what was found	61-83
Introduction			
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	86-97
Objectives	3	State specific objectives, including any prespecified hypotheses	98-102
Methods			
Study design	4	Present key elements of study design early in the paper	105-110
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	112-115 133
Participants	6	(*a*) Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up	112-115
		(*b*) For matched studies, give matching criteria and number of exposed and unexposed	NA
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	120-152
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	App. 1-2
Bias	9	Describe any efforts to address potential sources of bias	162,177
Study size	10	Explain how the study size was arrived at	114-119
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	153-181
Statistical methods	12	(*a*) Describe all statistical methods, including those used to control for confounding	173-181
		(*b*) Describe any methods used to examine subgroups and interactions	169
		(*c*) Explain how missing data were addressed	NA
		(*d*) If applicable, explain how loss to follow-up was addressed	162
		(*e*) Describe any sensitivity analyses	NA
Results			
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	183
		(b) Give reasons for non-participation at each stage	NA
		(c) Consider use of a flow diagram	NA
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	183-192
		(b) Indicate number of participants with missing data for each variable of interest	NA
		(c) Summarise follow-up time (eg, average and total amount)	Fig 1, 190
Outcome data	15*	Report numbers of outcome events or summary measures over time	Tbl 2, 4 199-227
Main results	16	(*a*) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	
		(*b*) Report category boundaries when continuous variables were categorized	Tbl4
		(*c*) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Tbl3, 259

Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	205
Discussion			
Key results	18	Summarise key results with reference to study objectives	231-237
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	273-278
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	238-270
Generalisability	21	Discuss the generalisability (external validity) of the study results	278
Other information			
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	30

*Give information separately for exposed and unexposed groups.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at http://www.strobe-statement.org.
