

Correction: Feasibility of identifying and describing the burden of early-onset metabolic syndrome in primary care electronic medical record data: a cross-sectional analysis

Errors occurred in an article published Nov. 24, 2020.¹

In Figure 3, the number of participants within the metabolic syndrome group for the overweight and obese category should have been 645/700, corresponding to a corrected percentage of 92.1%. The percentage given in the second paragraph of the Results section, first sentence, should also have been 92.1%.

In Figure 4, the missing body mass index total should have been 43/700, corresponding to a corrected percentage of 6.1%. The percentage given in the first paragraph of the Missing data subsection in the Results should also have been 6.1%.

These errors have been corrected at cmajopen.ca.
