

Appendix 6 (as supplied by the authors): Ninety-day risk of a hospital encounter with acute pancreatitis for patients accrued after June 2011

Exposure	Weighted Number of Patients (N)	Events		Odds Ratio	
		N	%	Odds Ratio (95% CI)	p-value
Sitagliptin	72 804	43	0.06%	0.67 (0.35 to 1.29)	0.2306
Alternative hypoglycemic agent	72 655	64	0.09%		

Patients prescribed glyburide, gliclazide, metformin or insulin served as the referent group.

Abbreviations: confidence interval (CI).

All patients identified prior to weighting were included in the analysis. The number of patients indicated represents a weighted total.
