

Appendix 2 (as supplied by the authors): Supplemental figures

Supplemental Figure 1A: Age profile of the population of community-dwelling, long-term sedative users, women aged 18 and older, British Columbia, 2013

Supplemental Figure 1B: Age profile of the population of community-dwelling, long-term sedative users, men aged 18 and older, British Columbia, 2013

Note: Long-term sedative use defined by the filling of prescriptions containing a total of 90 or more days' supply of sedative during the calendar year. Bar width scaled by population size and n is equal to the number of long-term sedative users in each age group

Appendix to: Weymann D, Gladstone EM, Smolina K et al. Long-term sedative use among community-dwelling adults: a population-based analysis. *CMAJ Open* 2017.
